Microelectronics Olympiad

Welcome to the **Second Microelectronics Olympiad of Israel** 2014 organized by Bar-Ilan University, Ramat Gan, Israel. This event is held as a part of the first stage of 9th Annual International Microelectronics Olympiad of Armenia.

The **Second Microelectronics Olympiad of Israel** will be held on May 13, 2014 at the Faculty of Engineering building (Bar-Ilan University), starting at 10:00 am.

The competition aims to spotlight Israeli's brightest and most talented young engineers under the age of 30. The competition is organized by the Faculty of Engineering at Bar-Ilan University to bring together, promote, and inspire the future generation of the microelectronics and semiconductors field in Israel.

Goals of the Microelectronics Olympiad:

- Stimulate further development of microelectronics in Israel
- Recognize and inspire young, talented engineers
- Increase interest in microelectronics among young specialists
- Create a community of young specialists involved in .00-electronics

The topics of the Olympiad:

- Digital IC Design and Testing
- Analog and Mixed Signal IC Design and Testing
- Semiconductor Devices and Technology
- Mathematical and Algorithmic Issues of EDA
