

The Optical Imaging and Biosensing lab at Bar Ilan University is looking for outstanding graduate students

The Optical Imaging and Biosensing lab at the Faculty of Engineering, Bar Ilan University, is looking for **outstanding graduate students that are interested in a Ph.D. degree** in one of the most exciting and emerging fields of biosensing and diagnostics.

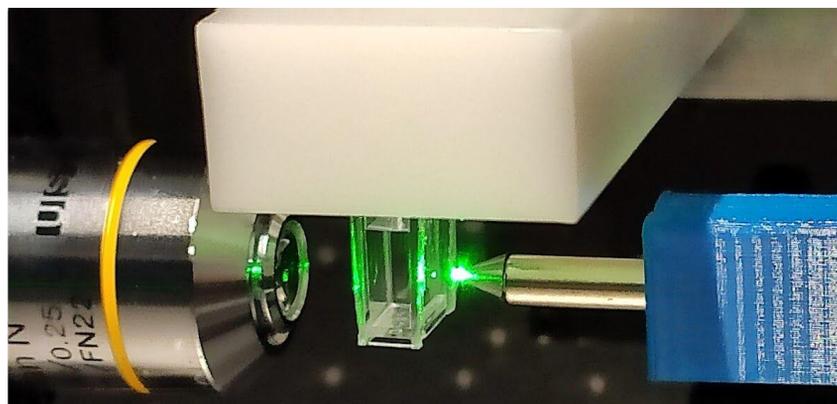

The lab focuses on developing tools for rapid detection of:

- Corona virus – Molecular, serological, and antigenemia assays
- DNA sequences – Cancer biomarkers and bacteria
- Protein-protein and protein-DNA interactions

The lab collaborates with different companies, hospitals, and leading research groups in the world

Scholarships are available for outstanding candidates!
